interGATE
- Navigation
- Routes/waypoints
- Geofences
- Text messages
- Address search

TASK MANAGEMENT
- Tasks
- Registrations
- Scans
- Text messages
- Indoor positioning

PERSONAL PROTECTION ALARM
- Transmits alarms with GPS coordinates
- May function as a "dead man's switch"
- Buttons for status messages

*ISM supports a wide range of receivers
(both hardware and software-based).
For further information, please visit www.innovative.dk

ALARMS & TASKS

- Receive fire alarms, burglar/intrusion alarms, elevator alarms, technical alarms etc. in one platform
- Supports both analogue and digital emergency calls
- Create and assign tasks to units (eg. vehicles and tablets/smartphones)

VIDEO & FLOORPLANS

- Receive alarms with video signals from cameras/NVRs/VMSs - irrespective of manufacturer
- View location of cameras/detectors and activate them manually using interactive floorplans

MAP & FLEET MANAGEMENT

- View real-time position and status of vehicles on map
- Search for addresses[1]
- Create and assign routes to vehicles
- Create geofences ("go"/"no-go" areas)
- Indoor positioning of units by floor level using Cisco® Wi-FI-solution

RESOURCE OVERVIEW & MANUAL DISPATCH SCREEN

- Real-time overview of unit status on dispatch screen
- Assign tasks to units directly from dispatch screen

POST-PROCESSING

- Detailed alarm log contains all events for every incident
- Automatically generate and send reports via email

INTEGRATION

- Use your existing CRM/ERP systems to manage customers in ISM™
- HTTP-interface (XML/JSON)
- 3rd party radio-dispatch systems

---

1   *Depending on availability in applicable country. May require additional module(s) for integration.*
