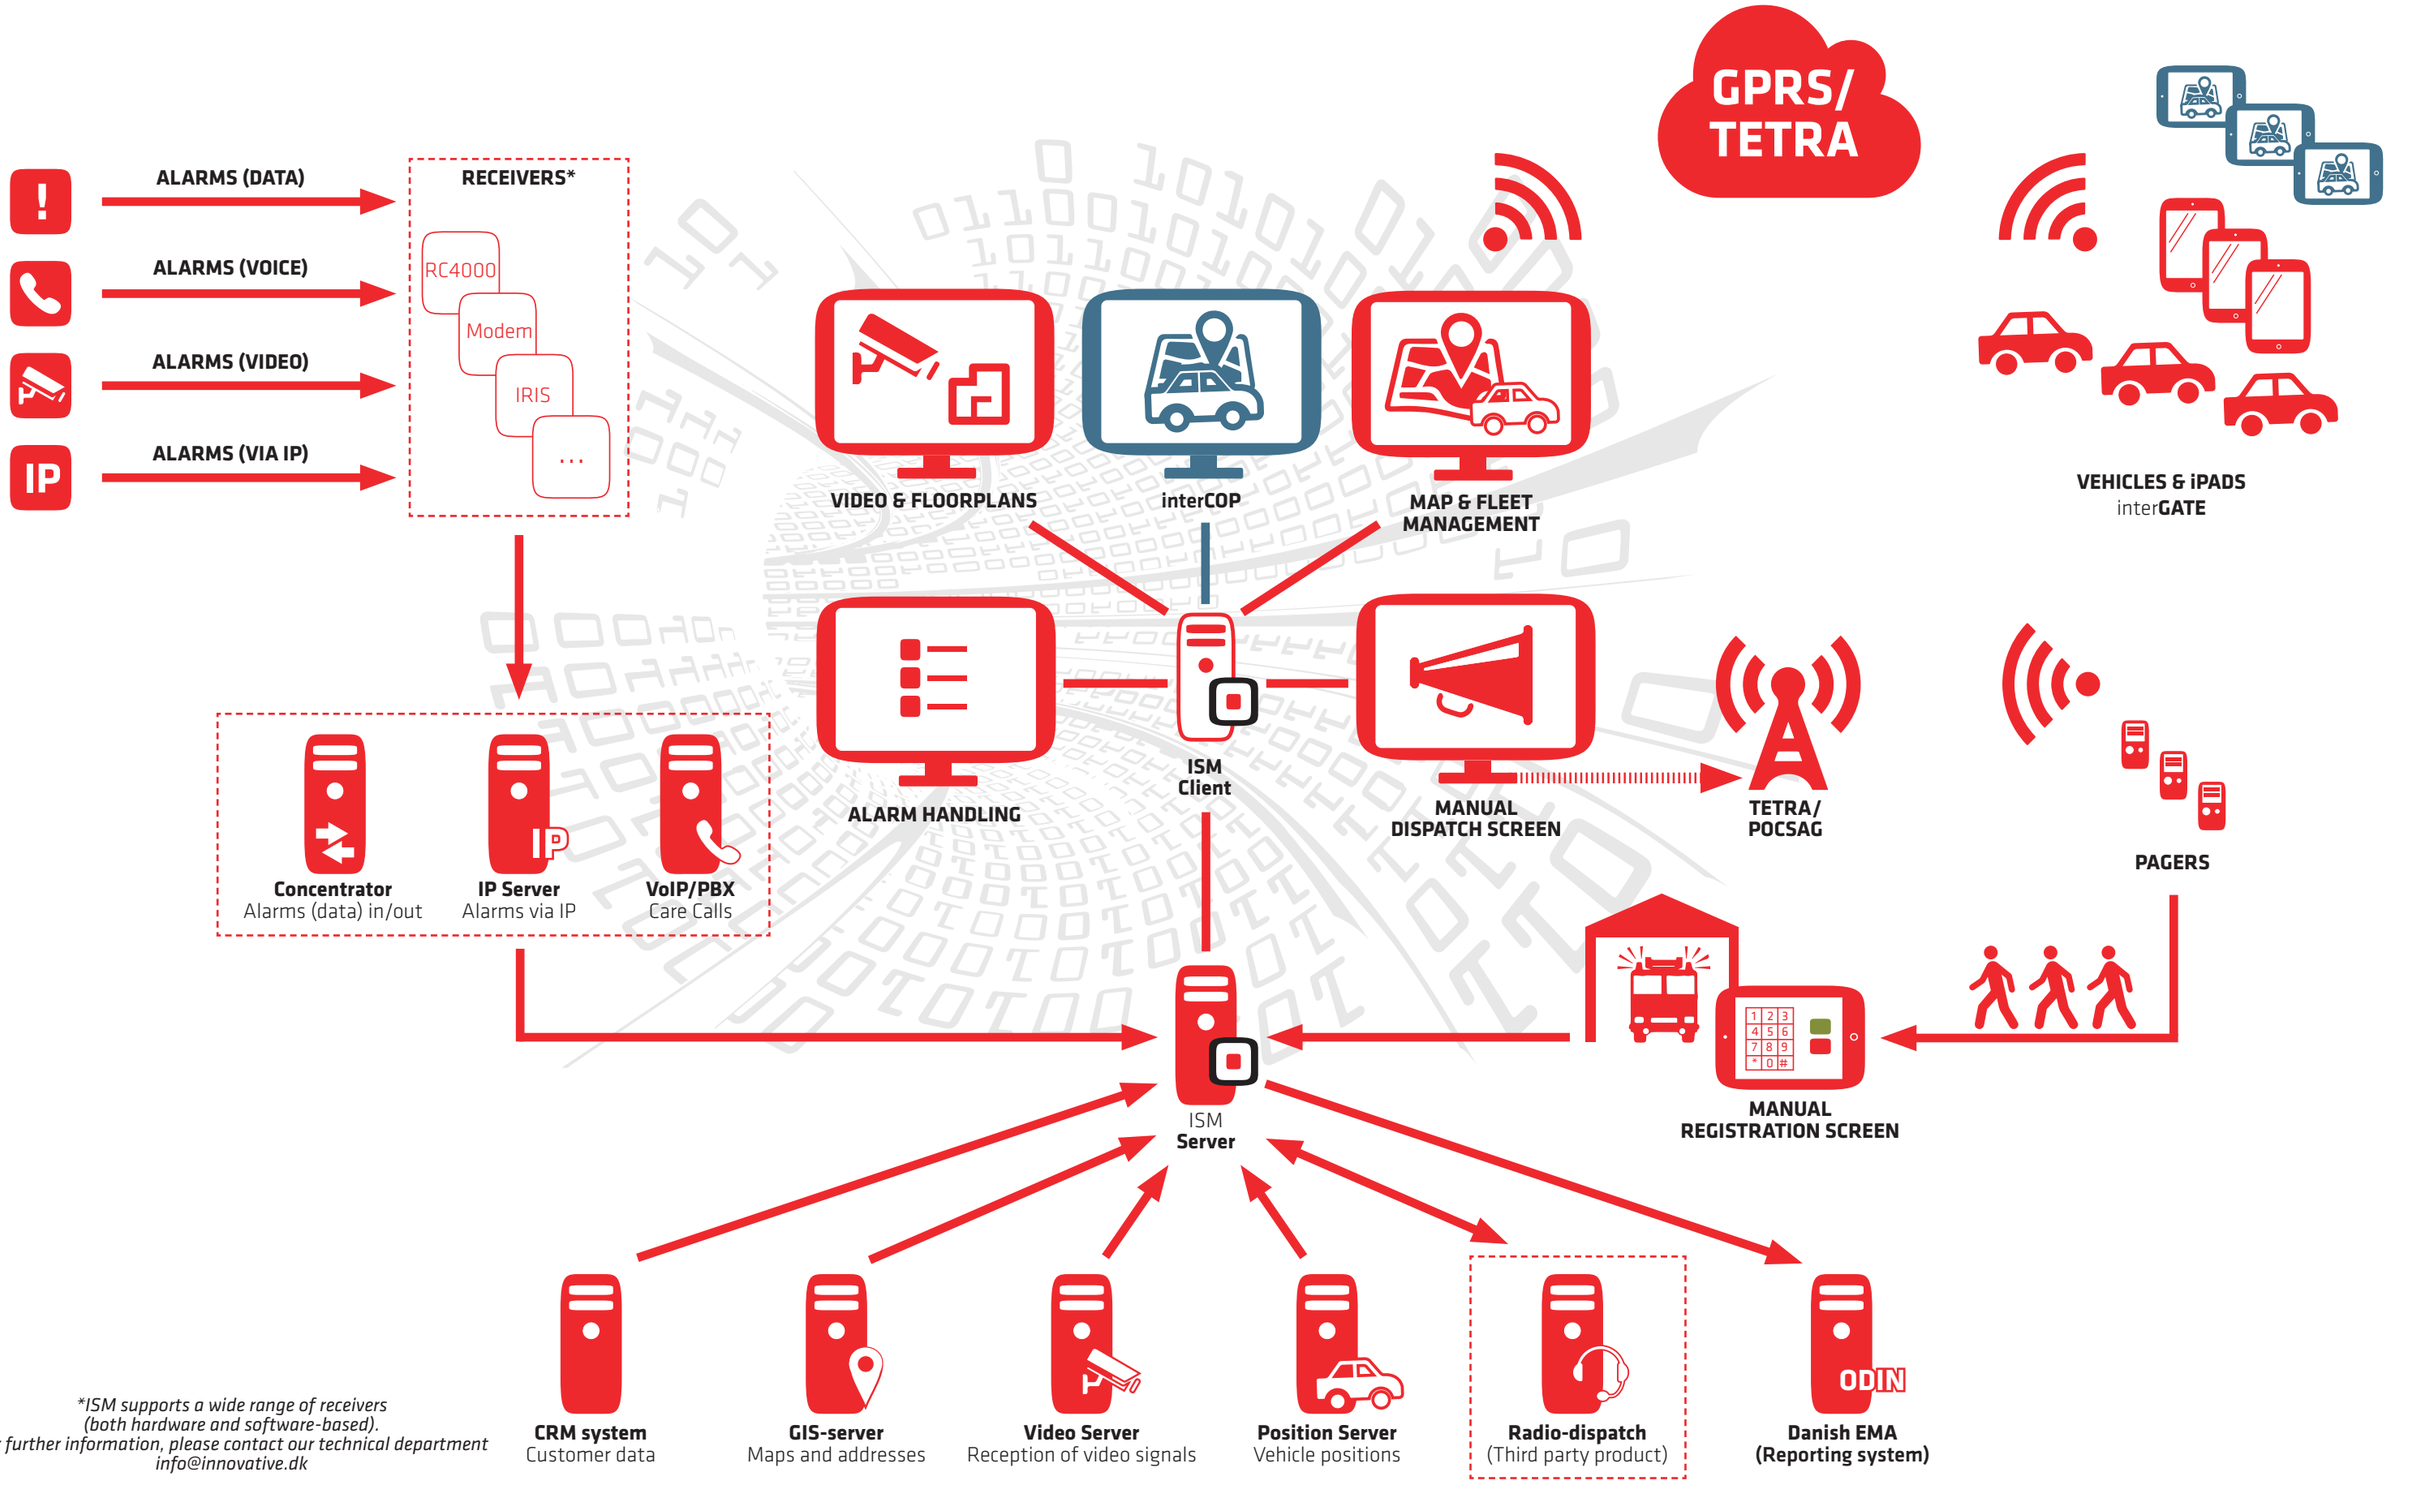
INNOVATIVE SECURITY MANAGER™ for Control Rooms



**ISM supports a wide range of receivers (both hardware and software-based). For further information, please contact our technical department info@innovative.dk*

GET THE FULL PICTURE

- Receive and handle burglar alarms, fire alarms, 112 emergency calls, elevator/lift alarms, technical alarms, care calls, incidents etc. in the same user interface
- Connect to public surveillance cameras and network video recorders
- View location of cameras/detectors and activate them manually using interactive floorplans
- View the current location and status of vechicles on a map
- Create and assign routes to vehicles

INCREASE EFFICIENCY

- Integrated control room solution handles all alarms, tasks and incidents in one single platform
- Integrated dispatch of personnel - automatically or manually
- Registration screen logs personnel arriving/departing at station
- Task and ressource management for scheduled and non-scheduled tasks

CREATE BUSINESS OPPORTUNITIES

- Act as contact centre between senior citizens and home care nurses (Care calls)
- Monitor the use of public vehicles with regards to scheduled maintenance intervals
- Document road inspection services
- Receive burglar alarms from public buildings

STAY FUTURE-PROOF

- Assign tasks/alarms to individuals or vehicles using iPad app
- Provide navigation, send receipts etc. directly from the app
- inter**COP** - communication and coordination between multiple public emergency agencies
- Task and ressource management using mobile devices (eg. guards)
