

ALARMS & EMERGENCIES

- Receive and handle distress calls from students, faculty members and other personnel
- activated via the ISM Safety App™ or a wide range of dedicated personal alarm devices
- Receive and handle fire alarms, burglars alarms, elevator alarms, technical alarms etc.
- all in the same platform
- Automatically initiate "lockdown" procedures by activating relays to close doors, open gates etc.
- Evacuate buildings using mass notification systems, such as information screens, public address systems, emails, social media and push notifications to the ISM Safety App™
- Dispatch alarms to PSAPs or other ARCs
- Select which persons to automatically alert
- Create and maintain instructions, procedures and preparedness plans

VIDEO & FLOORPLANS

- Automatically activate and watch live or recorded video from cameras/NVRs/VMSs
- Video module integrates to any kind of NVR/VMS - regardless of vendor
- Floorplan shows location of all cameras/detectors
- Activate cameras manually using interactive floorplans

MAP & FLEET MANGEMENT

- Track and communicate with all devices on an interactive map in real time
- Track, communicate and assign alarms to vehicles (including automatic route calculation, navigation, ETA reporting and arrival reporting)
- Indoor positioning - even on different floors (Cisco® wi-fi solution)
- Create geofences (go/no-go areas)

INTEGRATION

- Automatically notify other ARCs, police, medical services or fire departments

POST-PROCESSING

- Detailed alarm log for subsequent review, analysis and reporting
- Automatically schedule, generate and send reports via email
